Mount Fuji New Year Tours by Imperial Hotel Car Hire

HAKONE & LAKE ASHINOKO
Scenic Lake Ashinoko is on the Tokaido road, an ancient route linking Tokyo and Kyoto. The area has, in recent years, become a prosperous health resort and famous sightseeing spot.

FIVE LAKES OF MOUNT FUJI
The names of these lakes are Yamanakako, Kawaguchiko, Saiko, Shojiko and Motosuko. It is said that they were formed after ancient lava flows from Mount Fuji dammed up local rivers.

NIHONDAIRA
From this highland area, some 307m above sea level, one can get splendid views of Mount Fuji. The Miho pine tree grove and Suruga area is a world heritage site under which the melt waters from Mount Fuji flow.

OSHINO HAKKAI
There are eight hot springs in this area, all famous for being included among the top 100 hot spring resorts in Japan. The Fuji-ko cult venerated Mount Fuji as a female deity and its members were encouraged to climb it.
